

ST Office 365 Backup

Protect your business-critical data from disaster!

47% of lost business-critical data is caused by end-user error. ST Office 365 Backup is the leading data backup and recovery platform for Software as a Service (SaaS) applications.

There's a common misconception that all data saved to the Cloud is safe, however that's not true. Data saved by your employees on cloud applications like Microsoft 365 are permanently deleted after 30 days from the initial deletion.

ST Office 365 Backup is designed to manage, restore and export critical data, meaning your business data is protected and secured to the Cloud. Restore lost or corrupted files in a matter of seconds through our intuitive admin portal.

Our backup solution is the one stop shop for Microsoft 365 backup and delivers consistently reliable granular backups. You can rely on us for easy restores, secure data for regulatory compliance, all with world-class tech support!

- Consistent and reliable granular backups
- Fast and simple data restoration and exports
- Secure your data to meet regulatory and compliance needs
- World-class tech support
- Regain control of your business-critical data

Get back to business faster after data loss.

Our backup and recovery solution disassociate critical business information from the user who created it, and hands back control to the company.

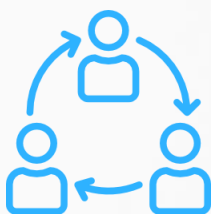

Protection against data loss

You never have to worry again about losing your data from Microsoft 365, no matter the cause. Whether an employee accidentally deletes a critical OneDrive file, or a misconfigured application workflow wipes or an entire folder unexpectedly, our backup service has the backup on hand.

Cut costs

Retaining critical user data if employees leave your company can be costly. ST Office 365 Backup allows you to salvage data from employees leaving your business, without having to pay for their vacated license. This could save you thousands in annual fees.

Employee lifecycle management

Enjoy seamless employee lifecycle management and enable a smooth transition for employees as they cycle in and out of the company. Our service allows administrators to restore departed user data to another account, download files directly, or simply archive a user's dataset until their replacement is hired.

Security & compliance

ST Office 365 Backup saves data in compliance with Service Organization Control (SOC 1/ SSAE 16/ SOC 2) reporting standards and supports HIPAA compliance needs. All data is encrypted both in transit and at rest in our dedicated Cloud.
